

Science Fair

How does it work?

We are excited to announce there will be a science fair held in Woodcote Primary School on the morning of Friday 18th May. The best entrants will go forward to represent our school at the Ashby School science fair, along with other primary schools from the local area, on Tuesday 12th June.

You will need to be able to present your understanding of how something works e.g. How does a boat float? / How does an eye work? / How does a new day begin? (You decide!).

You can work and plan on your own or with a partner (no more than 2 per group). You must produce a visual display to accompany your experiment (including your names, age and year group) and you will need to be able to demonstrate (via video or photographs if it's messy or time consuming!) and explain the science behind your investigation to an audience - keep it simple. We will remind you of this nearer the time and set your preparation as an iLearn challenge.

You will gain extra credit for linking your demonstration/investigation/experiment to a scientist, especially if you can raise awareness of lesser known scientists.

For ideas you may wish to use books or web sites, such as

www.sciencebob.com and www.sciencekids.co.nz
